From the *Editor-in-Chief*

To our Readers

Table of contents has reluctantly disappeared from our covers and moved to the front pages. Covers are now prepared entirely in the Editor-in-Chief's office so that we have slightly better control over the colors....

Continuing changes include: heavier paper stock and slightly glossier paper but still of high archival quality

More color photos than ever before (enumerate numbers)

With this volume, our online weblists now cover every continent, including Africa and Antarctica. Authors continue to update their annotated species and distributions annually.

More submissions, as of this writing, we have already received 50 submissions for 2009; during 2008 we processed 238. the current volume contains 57 manuscripts by 168 authors and co-authors representing 32 countries, with 86 nomenclatural novelties proposed. (During 2008, Mycotaxon published a total of 252 new taxonomic names and presented 205 papers by 597 authors in four volumes covering 1844 pages.) Unfortunately, with the increase in submissions, manuscript turn around times are slightly longer than we wish....

Indexing picks up; beginning with Mycotaxon 110 we will have additional new Index Editors so that we can finally catch up. (rephrase).

Quality of submitted manuscripts continues to improve and we continue to encourage expert assistance throughout the review process, with problem manuscripts sent out for further review. Nomenclature is more rigorous than ever blah blah

Now have entered into an agreement so that papers will apear on Cyberliber after only two years. "cost-free access to articles in back volumes is now up to date and on scheule, with all volumes from Mycotaxon 1 through Mycotaxon 88 available on the Cyberliber website.

Four easy steps to successful Mycotaxon publication

Mycotaxon's complete instructions, which were last updated in November, 2007, are posted on the Instructions to Authors page on the Mycotaxon website listed below. Prospective authors should download instructions PDF, expert reviewer comment and submission forms, and helpful templates by clicking the 'file download page' link on the instructions page before preparing a paper intending for the journal. Below is a summary of our simple '4-step' publication process.

Step 1—Peer review: Authors send a formatted text document with illustration files and Mycotaxon Reviewer Comments Form to two experts for peer review. Authors should (i) make certain that both peer reviewers have Emailed the comment forms to the *Editor-in-Chief* <editor@mycotaxon.com> and (ii) revise their manuscript according to reviewer suggestions **before** submitting a master text file to the *Nomenclature Editor* for nomenclatural review.

Step 2—Nomenclatural & French language review: Authors next Email their revised master text file (containing footnotes, tables and captions but ***NO*** illustrations) to the *Nomenclature Editor* <PennycookS@LandcareResearch.co.nz> for accession and pre-submission review. The Email message *MUST* include the word 'Mycotaxon' on the subject line and *MUST* include names **and** Email addresses of all peer reviewers. (Manuscripts written in French should also be submitted to the *French Language Editor* <decock@mbla.ucl.ac.be> at this time.) Editors will return annotated files with a list of needed corrections to the authors and *Editor-in-Chief.*

Step 3—Final submission: After authors receive their manuscript accession number and make revisions requested during nomenclatural review, they should send (i) a completed Mycotaxon submission form; (ii) separate text files for main text, tables, and legends; and (iii) art files to the *Editor-in-Chief* <editor@mycotaxon.com>. O**nly** text and image files considered ready for immediate publication should be sent at this time. The *Editor-in-Chief* will try to acknowledge receipt of files within two weeks. Authors are asked to wait at least 14 days before sending a follow-up query, to avoid unnecessary Email traffic near press deadlines or during temporary closures of the editorial office.

Step 4—Press preparation: After preparing a press-quality PDF from the author's text and art files, the *Editor-in-Chief* sends journal entries for the nomenclatural novelties and author index pages with the PDF proof to all coauthors for approval. Editorial errors are always corrected free of charge, but authors who ask the *Editor-in-Chief* to correct errors present in their original files will be charged $10 per correction (minimum charge of $40). Payment arrangements of all fees should be made by writing the *Business Manager* <subscriptions@mycotaxon.com>.

Mycotaxon frequently updates its webpages and regularly posts abstracts, table of contents, indices, distributional checklists, and revised instructions and forms on its website. We invite all of you to browse our website frequently for updated journal and other interesting mycological news.

WHAT REVIEWERS SAY ABOUT TENG'S FUNGI OF CHINA:

"... one of the most valuable books on the fungi of China ever published in English." —*Mycologia* 90: 1091-1092, 1998.

"... a great big blue uncompromising brick of a book ... an instant classic. Anyone interested in identification of fungi, particularly in Asia, should get this book immediately. Mycology owes another debt to Dick Korf for his sympathetic and intelligent editing of this superb work." —*Bibliography of Systematic Mycology* 10(6): xlviii-xlix. 1998.

"The book is important for any researcher interested in the systematic relationships, diversity, and distribution of fungi on a global scale." - *New Zealand Journal of Botany* 35: 265-266. 1977.

Fungi of Northwestern China, EDITED BY WEN-YING ZHUANG
